

WATER: OUR SOURCE OF LIFE

By Jacqueline Fields MD and found of *Dr. Fields' Sacred Skin* | February 2007

The purity of water is an important topic. Our current scientific research clearly indicates our world's water source has not remained pure. We have all sorts of concerns about the chemicals/pharmaceuticals that make it into our water. I have had an amazing experience with one local source of water that I thought was worth mentioning.

Years ago a physician friend of mine told me of a source of water in Rawlins Colorado approximately a 2 hour drive from here. It is called Wide Awake Spring on Uncle Charlie's Ranch. The area is surrounded by mining but because the water is protected it is untouched by radiation, acid rain, nuclear fallout and other pollutants. It is a rare source of pure living water. The living water will make your cells of your body permeable again which release many toxins and allow more nutrients to be absorbed. Because of its' molecular structure it provides maximum hydration.

The water is ancient, according to hydrologist it could be approximately 30,000 years old. Wideawake spring comes from a unique and rare granite quartzite formation called water rock. The rock filters the water before it reaches the surface giving the purest, natural water available. Water rock is very rare. This water is an ancient source that is a gift from our old pure earth.

Years ago, when I first heard of this water I said I would try it on 10 of my sickest patients. To mention a few, the cases included: cancer, chronic fatigue, autoimmune disease, arthritis, multiple chemical sensitivities, addictions, and patients that needed emotional or spiritual clarification. We are 70% water so I knew this could be like a transfusion to patients, both physically and spiritually. It is similar to how people feel when they have a pure diet, like living food. Some patients really did feel the detoxification. Many patients feel clarity. If part of their illness is transformation that is needed, the water seems to magnify the

clarity. Things in ones life that does not align seems to magnify and become clear: sometimes that means ones jobs or spouses. I have witnesses those kinds of big shifts.

Before I gave the water to patients, I had CSU water lab do and analysis. The CSU lab as well as three independent labs have all determined that this water has a perfect PH of 7.0 as well as having the lowest dissolved solid parts per million of any known water. Because of this, the water hydrates, cleanses and rejuvenates.

If the patients had gone through lots of chemotherapy or radiation, the water clearly helped them detox. I can report now that the original 10 patients are all well. My most amazing case is a case study I would like to present in the future. She is a patient that has had cancer of one sort or another for my whole career. She is now cancer free for 4 years. With cancer I do many things beside the water, but the water was part of her healing and changing her internal terrain.

I tell patients my experience with drinking the water is not just physical cleansing but also mental clarity. It changes me, sometime faster them my co-workers or family wants. When I drink it, I have homeopathic doses like a few glasses a day. My body never wants to toxify with bad food or alcohol when I am drinking the water. Recently I have witnessed it helping my patients with addictions. I recommend patients investigate this web-site further and maybe consider a field trip up to the source. The website is www.unclecharliesranch.com.
