

Nano Skin Refiner

Nano Skin Refining is an advanced Skin Treatment Technology which is customized to suit any skin type and condition. The active ingredients of products being used during the treatment, are released deep down into the dermis to target the signs of aging.

The Nano Skin Refiner more effectively boosts the active ingredients and stimulates and promotes rapid collagen and elastin production to refine and significantly improve acne, scarring, stretch marks, rosacea, wrinkles, sun damage, dehydration, dryness, hyperpigmentation, rough skin texture, skin discolorations, melasma, distended capillaries and dyschromias. It also aides in alleviating symptoms of seborrhea, dermatitis, eczema, psoriasis, Folliculitis, hair

Skin refining is 100% natural nano technology which is very safe, painless and extremely effective. During the treatment process, the 36 mono crystalline silicone nano needles, each one, one third the size of a strand of hair separate and re-arrange the skin's cell to allow nutrition to pass through the skin barrier. It provides 100% more absorption of ingredients via the nanoscopic aqua channels.

Nano Skin Refiner Wand

using
Dr. Fields'

Sacred Skin products
\$75 per treatment
With coupon
Package discounts
Available!

- ◆ Resurface, Remodel
- ◆ Regenerate, Refine, Renew
 - ◆ 100% Natural
- ◆ Non Invasive/No Trauma or Injury
- ◆ Cutting-Edge Innovation
 - ◆ Gentle and Safe
 - ◆ Effective and Painless
 - ◆ Targeted Skin Layer
 - ◆ Intensive Treatment
 - ◆ Instant Results
 - ◆ Minimal Down Time
 - ◆ Fast, Effective, Affordable

What is Nano Skin Refining?

Nano Skin Refining is an innovative and intensive, trans dermal delivery of large density and active ingredients to effectively treat esthetic skin conditions. Nano Skin Refining is used as an adjunct treatment to facials, peels microdermabrasion etc... and used as an alternative to invasive injections and traditional micro-needling. Not to be mistaken with "micro-needling", It is a 100% natural technology which is very safe, non-invasive and only enters the epidermis, therefore

is painless but very effective. It is a handheld skin care enhancement device with an array of pyramid-like Nano Pins. Each pin on the array has a diameter smaller than that of a single strand of human hair, which is almost invisible to the naked eye. A standard Nano Wand carries 36 pyramid like pins on a 16 mm Nano chip. It is manufactured from mono-crystalline silicon, using advanced semiconductor fabrication technology. When these pins gently touch the skin, they form up to 200,000 invisible Nano channels within a 5 minute treatment. As a result, the skin cells re-arrange themselves to allow nutrition to pass through the skin barrier in order to help the absorption of skin care products and to effectively feed the skin and stimulate collagen production. Within 15 minutes, after the treatment, the skin cells in the perforated layer return to their original position. Therefore, the skin naturally absorbs the active ingredients many times more effectively through Nano channels, refining wrinkles, scarring, hyper pigmentation and other skin imperfections, improving and restoring the overall health of the skin.

Safe

Nano chip is made of the highest purity (99.99999%) Mono Crystalline silicon. It has excellent bio-compatibility with the skin. The Nano Pins are so thin that they are able to perforate the top layer of the skin without damaging it. The micro pores close in less than 15 minutes after the perforation as the effected skin cells go through a natural healing process.

Effective

As the Mono Crystalline Pins run through the skin, they create hundreds of thousands of Nano Channels within 5 to 10 minutes. During this time, your skin is significantly more refined at absorption and retains more benefit from active ingredients. The Nano perforations allow for precise control in terms of depth and distance and have a much greater density. Nano Skin Refiner Wand instantly allows up to 1000% more absorption of whatever skin care products you use.

Results

In terms of absorption enhancement, Nano Skin Refiner is the only non-invasive treatment which acts more effectively than other "needling" treatments, as it does not tear or damage the skin. It feeds your skin nutrients, rather than forcing them in with invasive and damaging implements and treatments. Aging is a dynamic natural process and so should be your skin care regimen.

Treatment Areas

Nano chip is 16mm, so it is very versatile to treat different areas on the entire face or body. You are able to treat an entire area for overall skin exfoliation & refinement. Or target specific areas like Forehead Lines, Crows Feet, Eye Sagging & Puffiness, Hyper pigmentation, Skin Discolorations, Lines & Creases around the Mouth, Loose neck, Jaw line, Decollete, Acne, Scarring, Folliculitis, Psoriasis, Eczema, Dermatitis, Hair Loss, Spider Veins.....

Treatment Frequency & Maintenance

For optimum results, it is recommended to begin a course of 4 weekly treatments, followed by 1 treatment done every other week for 4 weeks and 1 maintenance treatment once every 4 to 6 weeks thereafter.
